Workshops

What was your biggest takeaway
from the keynote?

low-code is dead

as we know it

intelligence is now abundant

The Guardian

Reid Hoffman: 'Start Using AI Deeply. It Is A Huge Intelligence Amplifier'

The co-founder of LinkedIn and Democrat donor remains confident that AI can be good for all of us – if its introduction is handled in the right way

WORKLAB

AI at Work: Intelligence on tap will reshape knowledge work

Affordable, remarkably capable AI will dramatically expand what every organization and employee can accomplish.

The Guardian

Demis Hassabis On Our AI Future: 'It'll Be 10 Times Bigger Than The Industrial Revolution – And Maybe 10 Times Faster'

The head of Google's DeepMind says artificial intelligence could usher in an era of 'incredible productivity' and 'radical abundance'. But who will it benefit? And why does he wish

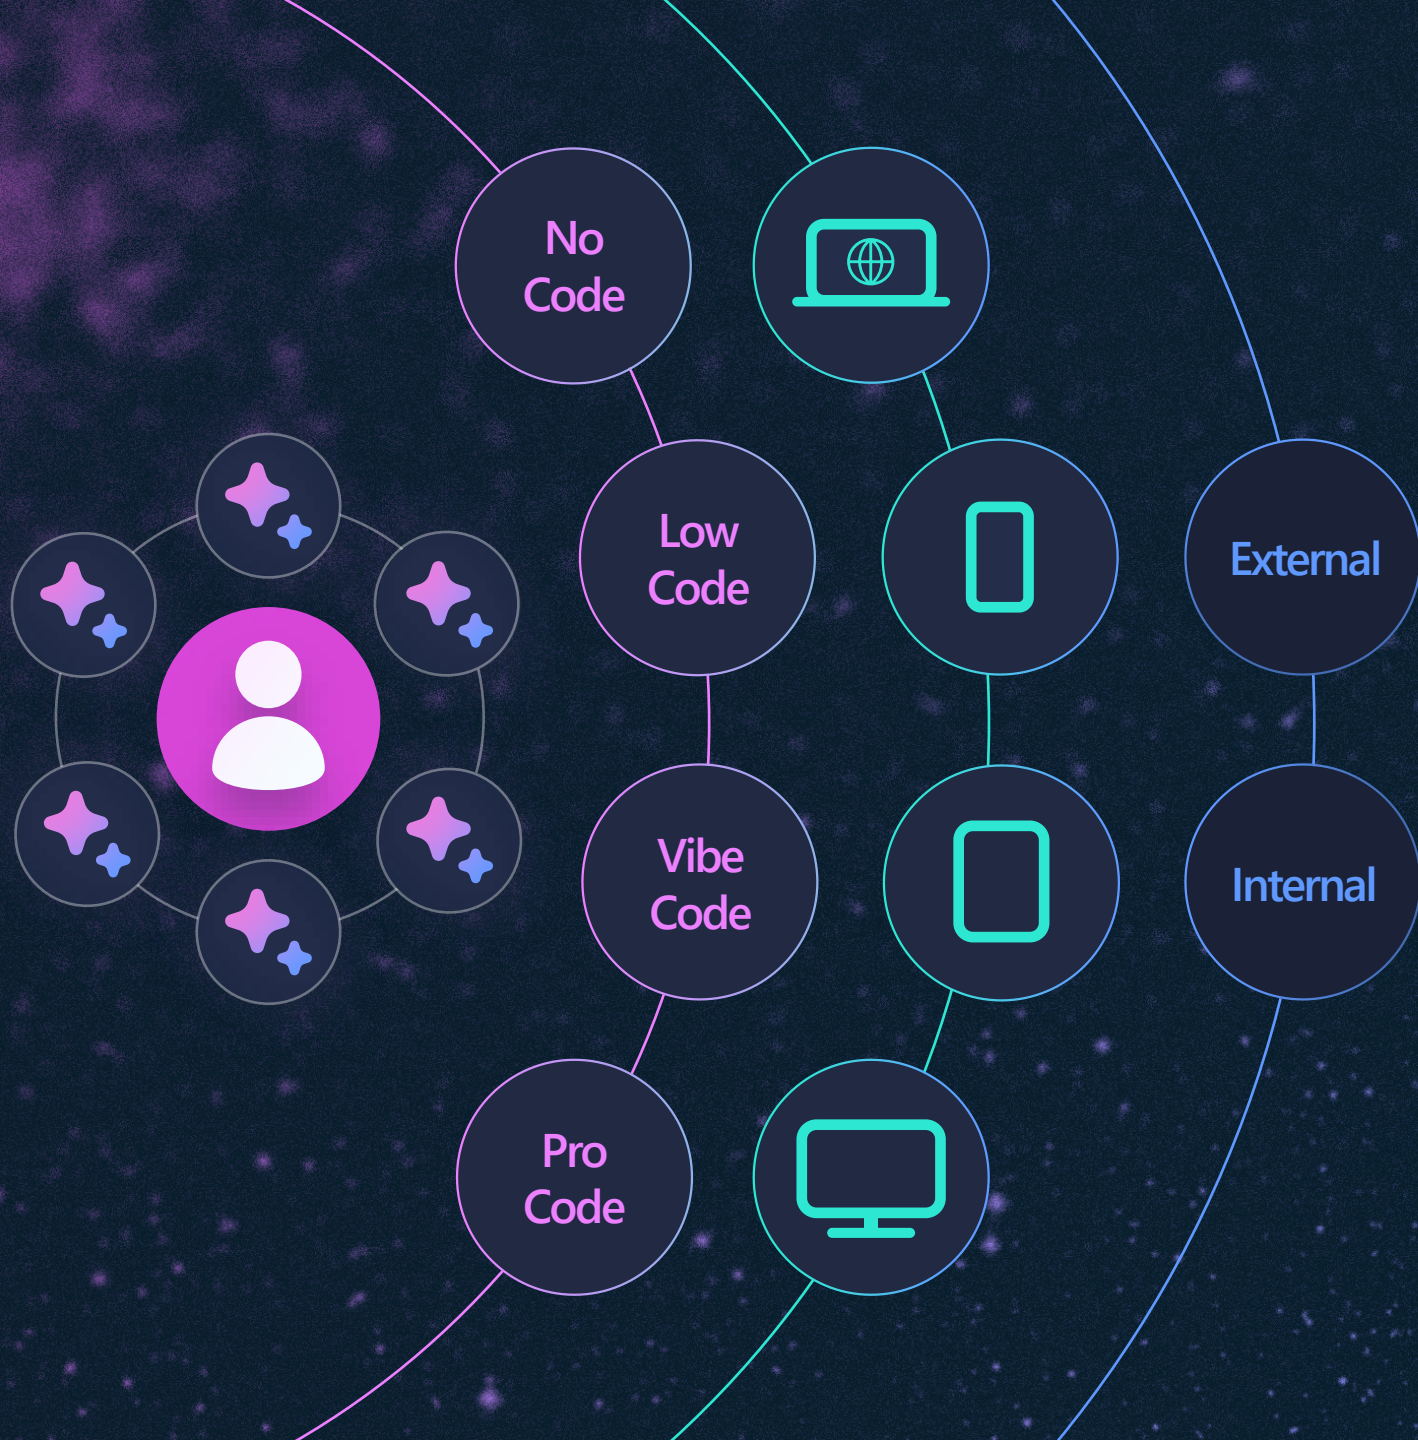

making
curiosity
creativity

your ideas can be limitless

Power Platform is reborn

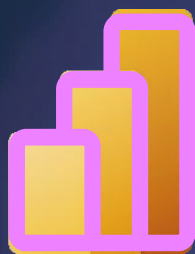

Power Apps

Your software
solutions,
your way

AI embedded everywhere

GA this week

Microsoft 365 Copilot App Builder

- **Build interactive, no-code apps** in minutes to boost personal and team productivity
- Start quickly using your **existing data and documents** from Microsoft Graph.
- Store app data in Microsoft 365 for **instant deployment** in Microsoft 365 Copilot.
- **Easily share with coworkers** like you would a document and launch them within Microsoft 365 Copilot – with security and governance baked in.
- **Secure by Design:** App Builder in Microsoft 365 Copilot operate within the user's context and follow role-based access controls (RBAC) for governance and compliance.
- **Admin Control:** Administrators can manage access to these tools, enabling group-level permissions so only approved users can create and use agents and inventory all apps built using App Builder.

Feature comparison

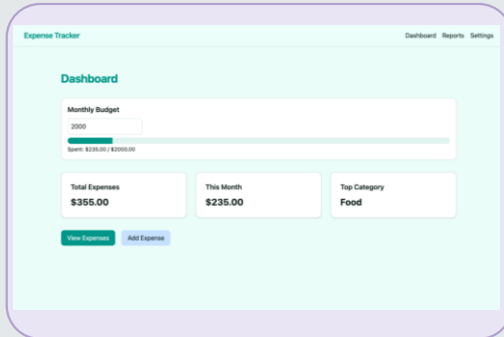

Purpose-built for complementary, not competing scenarios

 **App Builder**
Personal and team productivity

 **Power Apps**
Enterprise value and scale

Maker experience	Prompt to app	Low/Pro code Prompt to code
Connectivity	Access to M365 Graph	Access to 1400+ connectors, incl. Premium connectors
Data Storage	SharePoint Lists	Dataverse
Automation	None	Cloud flows
Deployment	Embedded M365 Copilot experience only, Internal applications	Desktop, web, mobile Microsoft Teams Power Pages
Governance	Inherits M365, basic admin monitoring	Enterprise Full (Managed Environments, ALM)
Extensibility	Edited through agent	Native integration across Microsoft Pro-code extensibility

What scenarios are a good choice for App Builder?

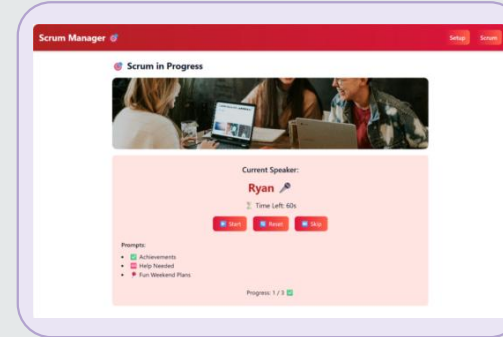

Productivity

- "Build a team scrum app that randomizes the order, and has a minute timer"
- "We host regular tech talks and need an app to manage scheduling and tracking"
- "I need an app to track our office inventory"

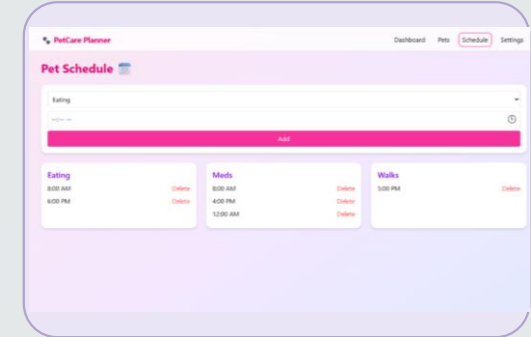

Presentation

- "I need to make a proposal to a customer for purchasing, include an interactive ROI and pricing calculator"
- "I need a timeline app that I can use to track product dates and releases, make sure I can drill in to understand more"

Prototyping

- "Design a landing page for a fictional startup with a hero section, feature blocks"
- "I need a fast marketing page - clean typography, testimonial slider, and a simple signup form. Ship it with sample copy I can edit."

Play

- "Create a quiz app that tests users on world capitals with multiple choice buttons."
- "Create a simple app that lets users ask questions about cats and get fun facts in response."

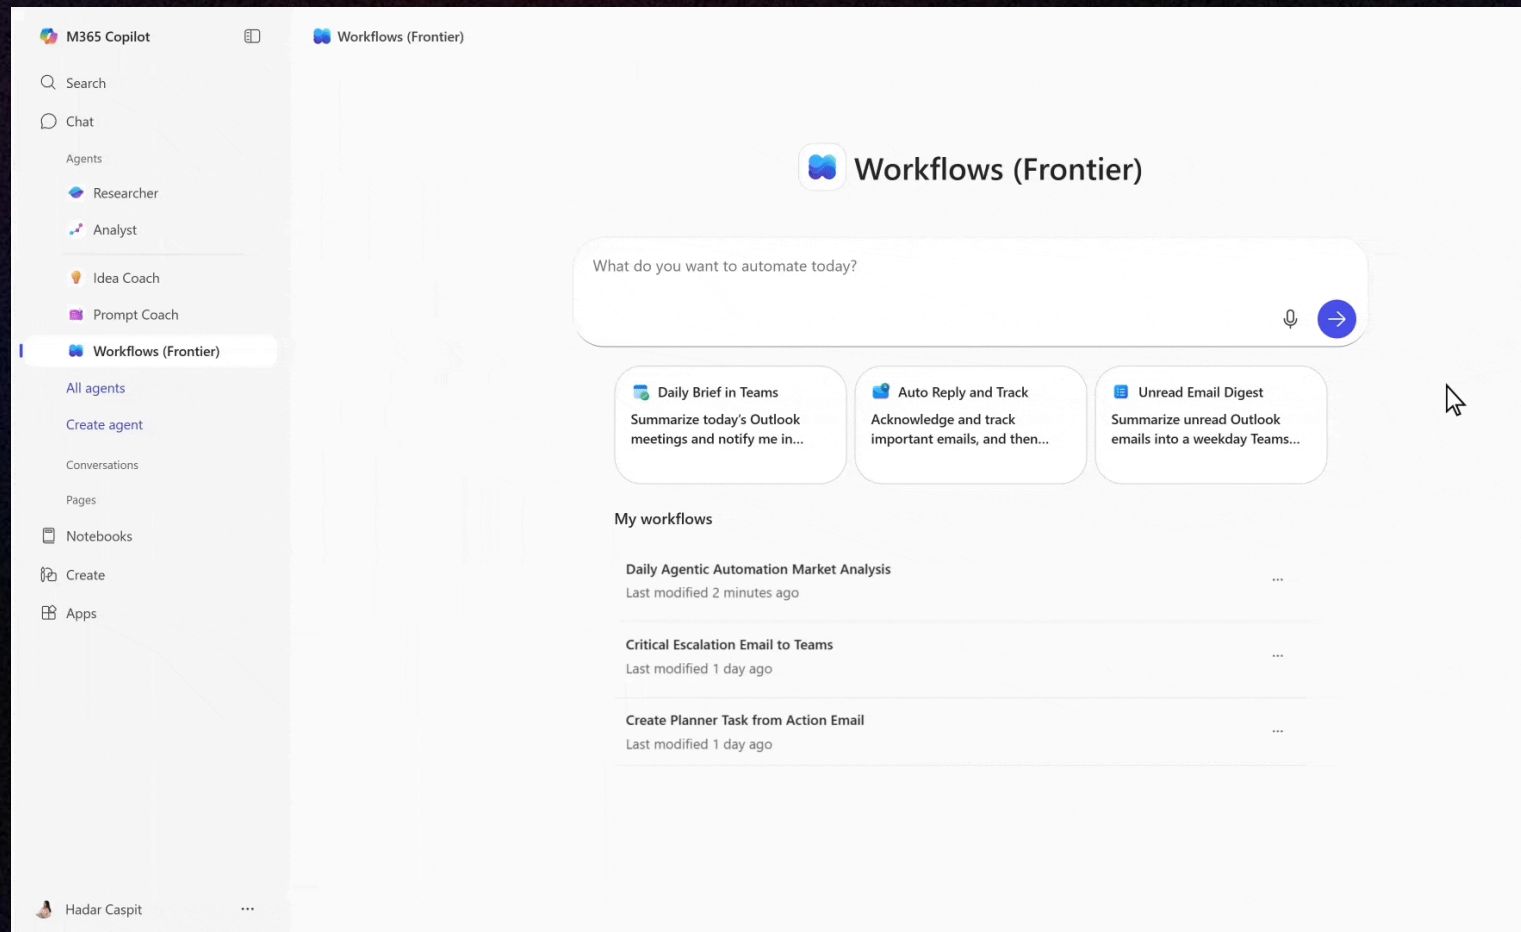

Information Workers

Introducing Workflows Agent

Users can now **create intelligent workflows directly from M365 Copilot** with Workflows Agent. Effortlessly automate tasks across your M365 applications like Teams, Outlook and Planner.

Users will be **guided to prompt and define their automation** while Workflows Agent actively builds the workflow in a graphical representation

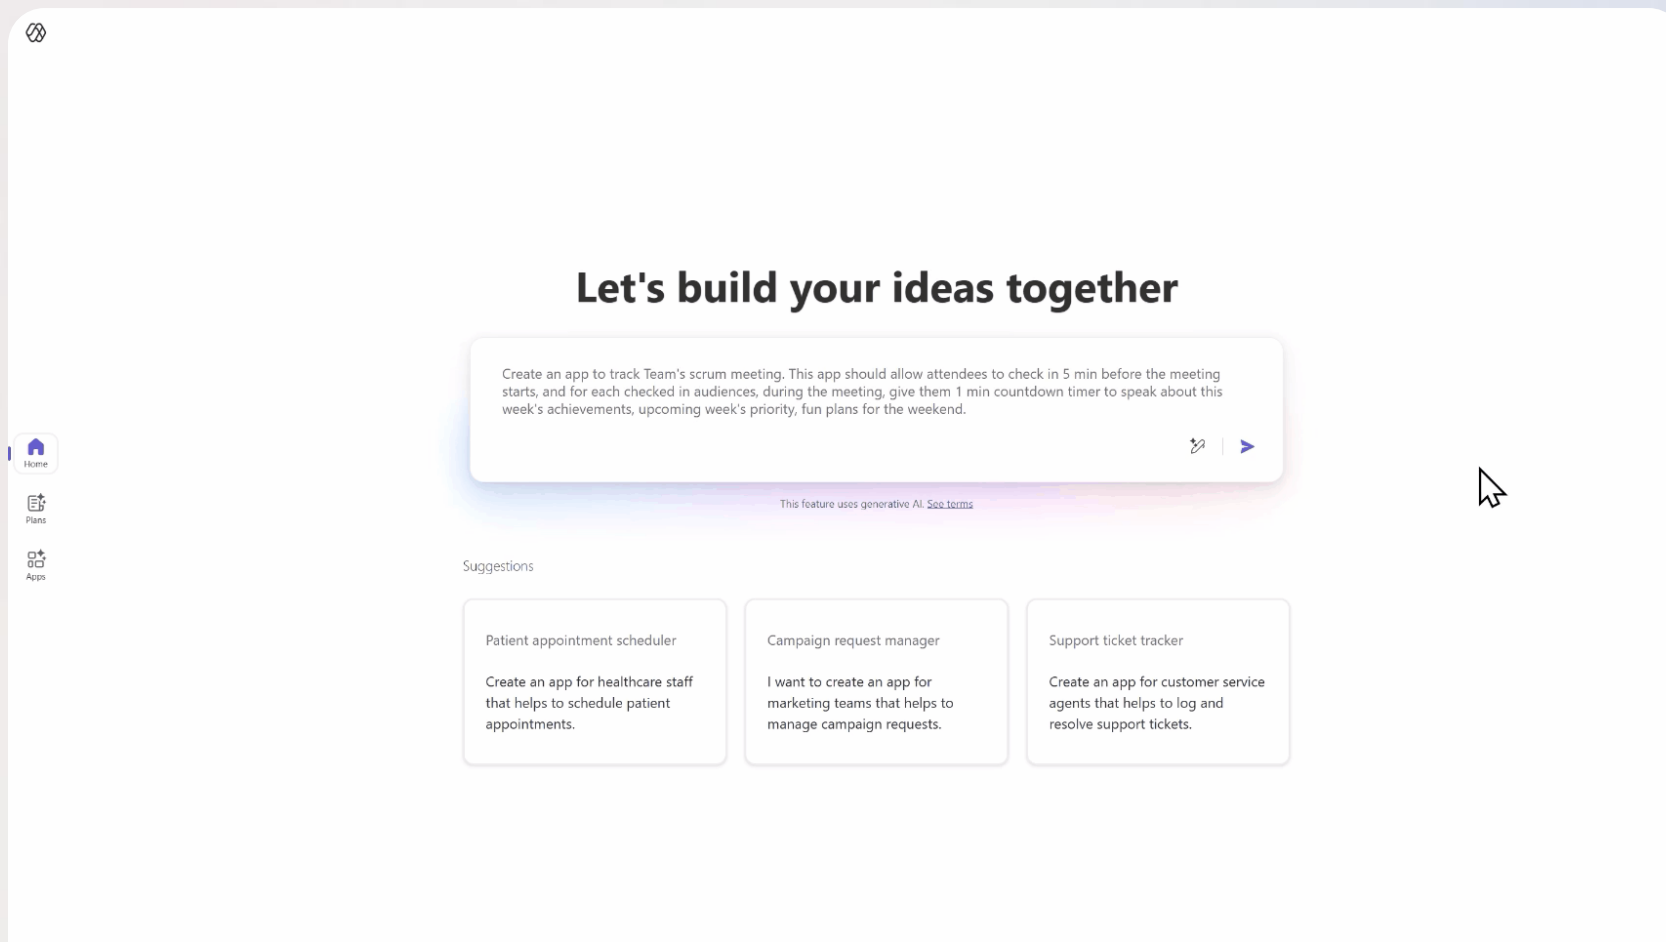

Manage and edit active flows directly within M365 Copilot

Answers Quality

- Agentic RAG for data in SharePoint
- Improved quality over graph connector
- Reason over Structured Data using code interpreter
- Better maker controls for precise knowledge selection and targeting

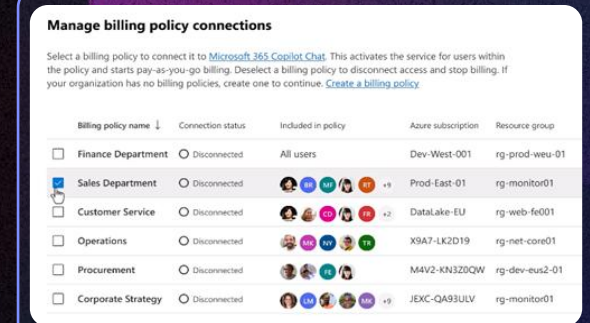

Evaluations & Analytics

- Enable evals for makers
- Analytics – User Themes, ROI, Multi-Agent

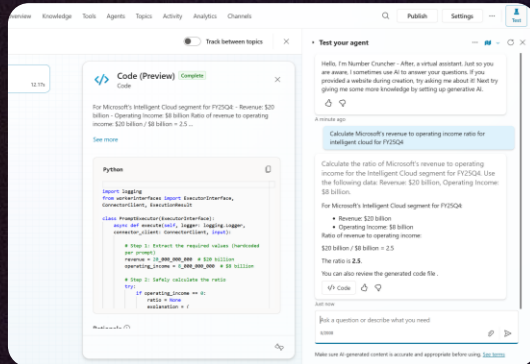

Model Choice and Fine-Tuning

- MCS makers have access to the latest and greatest set of models when making their agent
- MCS can use a fine-tuned model to improve answers

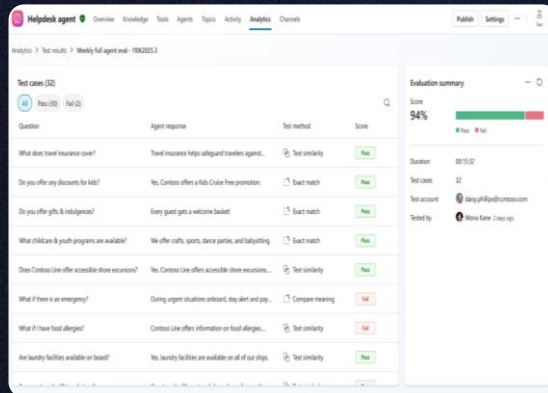

Core Admin & Governance Capabilities

- Enhanced control system for Agents, and agent inventory
- Lifecycle and Zone governance
- Cost and Adoption Management
- Operations & Reliability Monitoring

- MCS can use a fine-tuned model to improve answers

Core Admin & Governance Capabilities

- Enhanced control system for Agents, and agent inventory
- Lifecycle and Zone governance
- Cost and Adoption Management
- Operations & Reliability Monitoring

Evaluations in MCS

Ensuring agent quality – before deployment :

Makers **evaluate agents' quality** directly within Copilot Studio.

Run structured tests to evaluate key scenarios and catch regressions early.

Build or import test sets – upload predefined files, reuse user interactions, or let AI generate new queries from metadata and topics.

Measure detailed results that best fit your business needs with grader-based scoring.

Iterate until reaching the optimal passing score, ensuring confidence before release.

The screenshot displays the Copilot Studio web interface. The top navigation bar includes 'Home', 'Create', 'Agents', 'Flows', 'Tools', and a menu icon. The main header shows 'Helpdesk agent' with a green status icon, followed by tabs for 'Overview', 'Knowledge', 'Tools', 'Agents', 'Topics', 'Activity', 'Analytics' (selected), and 'Channels'. On the right of the header are 'Publish', 'Settings', and a user profile icon.

The 'Analytics' tab is active, showing 'Test results' for 'Weekly full agent eval - 11062025.3'. Below this, there's a section for 'Test cases (32)' with filters for 'All', 'Pass (30)', and 'Fail (2)'. A table lists the test cases with columns for 'Question', 'Agent response', 'Test method', and 'Score'.

Question	Agent response	Test method	Score
What does travel insurance cover?	Travel insurance helps safeguard travelers against...	Text similarity	Pass
Do you offer any discounts for kids?	Yes, Contoso offers a Kids Cruise Free promotion.	Exact match	Pass
Do you offer gifts & indulgences?	Every guest gets a welcome basket!	Exact match	Pass
What childcare & youth programs are available?	We offer crafts, sports, dance parties, and babysitting.	Exact match	Pass
Does Contoso Line offer accessible shore excursions?	Yes, Contoso Line offers accessible shore excursions....	Text similarity	Pass
What if there is an emergency?	During urgent situations onboard, stay alert and pay...	Compare meaning	Fail
What if I have food allergies?	Contoso Line offers information on food allergies....	Text similarity	Fail
Are laundry facilities available on board?	Yes, laundry facilities are available on all of our ships.	Text similarity	Pass

On the right side, the 'Evaluation summary' panel shows a 'Score' of 94% with a green progress bar. Below this, it lists 'Duration' (00:15:32), 'Test cases' (32), 'Test account' (daisy.phillips@contoso.com), and 'Tested by' (Mona Kane, 2 days ago).

New Analytics capabilities

More insights into production use and perception of agents:

Explore how your agent performs through the **main themes of the user/agent interaction**.

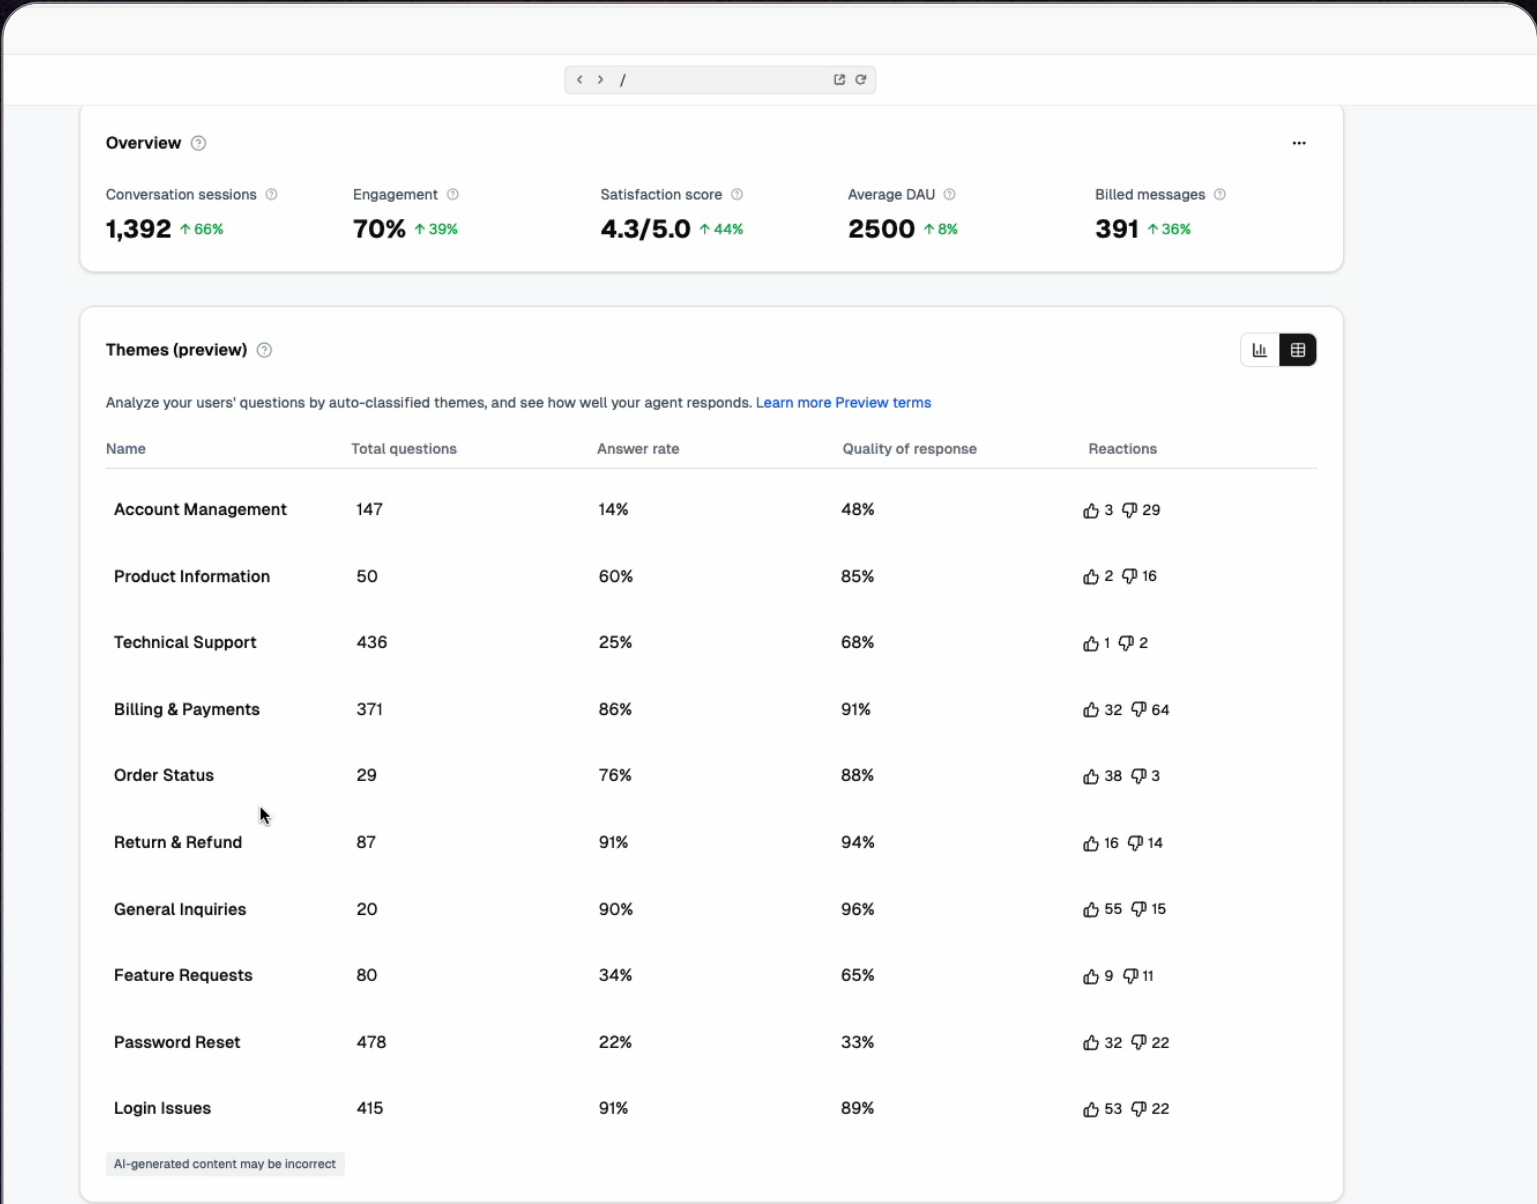

Analyze direct user feedback with reactions.

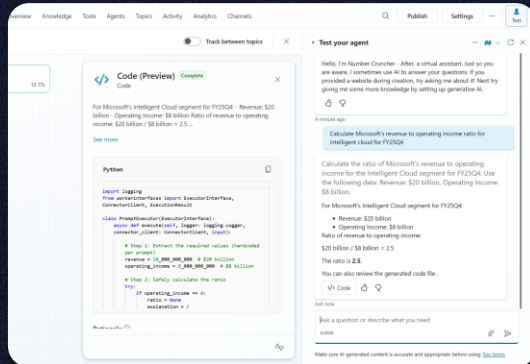

Simplify advanced interactions and understand how **connected & child agents** perform.

Optimize agents' utilization with detailed visibility into credits consumption and limits.

Receive an AI summary for top analytics insights.

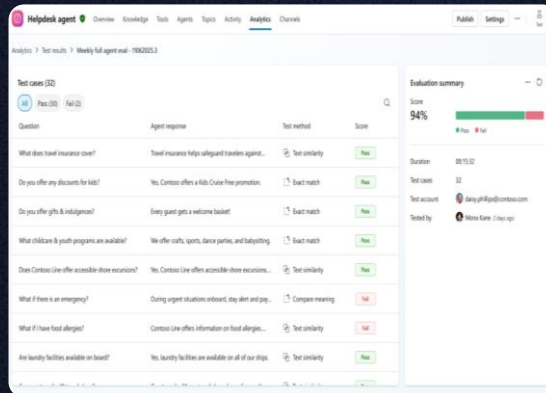

Use natural language to question, and reason over, copilot analytics.

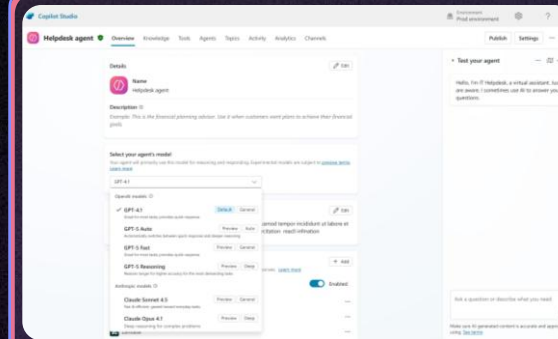

Answers Quality

- Agentic RAG for data in SharePoint
- Improved quality over graph connectors
- Reason over Structured Data using code interpreter
- Better maker controls for precise knowledge selection and targeting

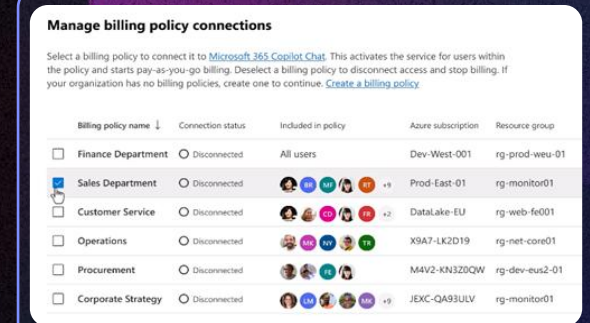

Evaluations & Analytics

- Enable evals for makers
- Analytics – User Themes, ROI, Multi-Agent

Model Choice and Fine-Tuning

- MCS makers have access to the latest and greatest set of models when making their agent
- MCS can use a fine-tuned model to improve answers

Core Admin & Governance Capabilities

- Enhanced control system for Agents, and agent inventory
- Lifecycle and Zone governance
- Cost and Adoption Management
- Operations & Reliability Monitoring

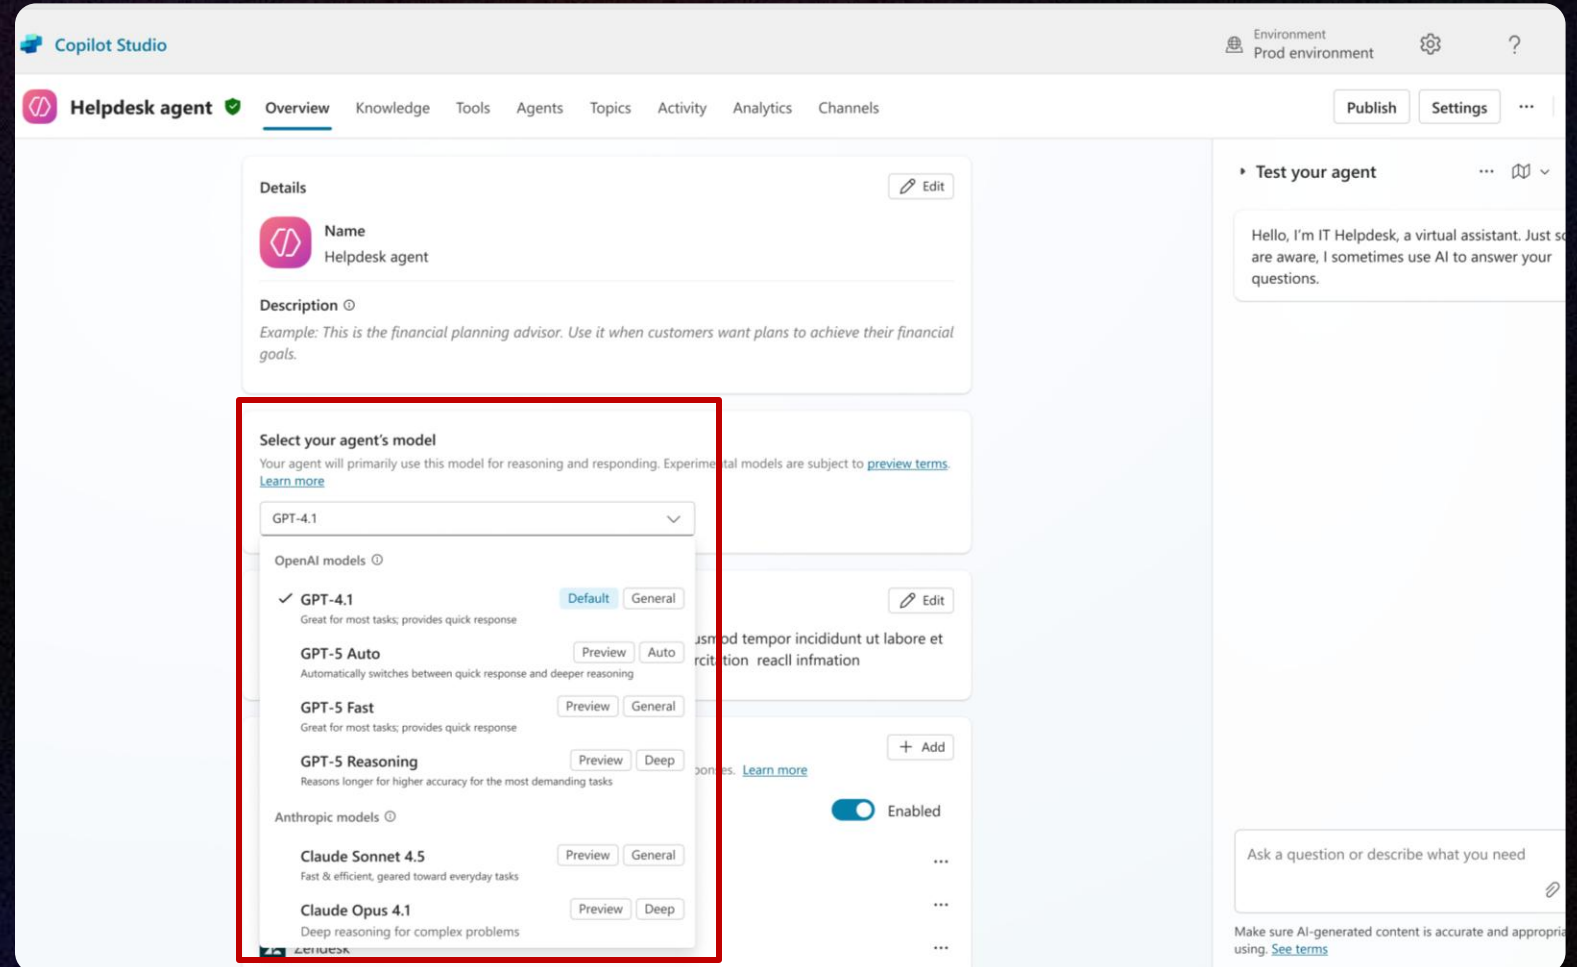

Model Choice with the latest industry models

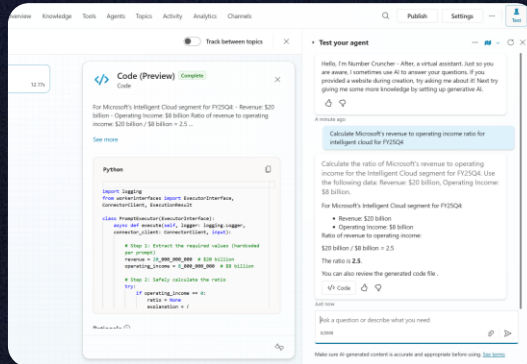

Model Choice

Latest AI LLM models available in Copilot Studio **at the same time they are launched by Open AI and Anthropic**

Expand the model choice **beyond OpenAI models**, providing makers with more choice and flexibility to design and optimize their agents and workflows.

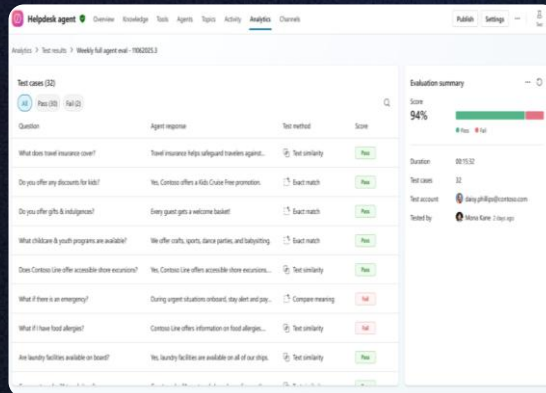

Experiment with a variety of LLM models to evaluate and select models that best meet your use case across industry, function and process.

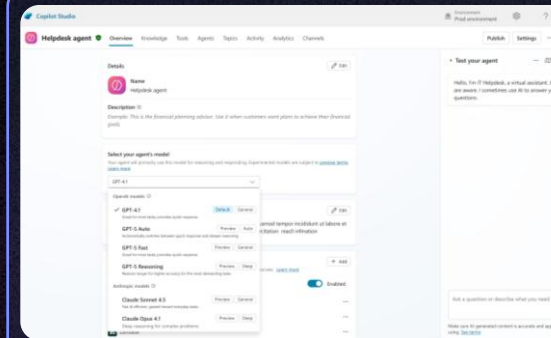

Answers Quality

- Agentic RAG for data in SharePoint
- Improved quality over graph connectors
- Reason over Structured Data using code interpreter
- Better maker controls for precise knowledge selection and targeting

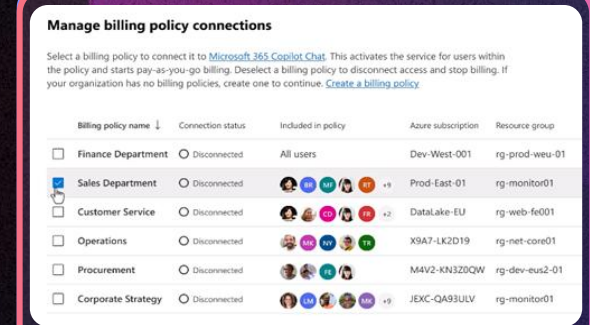

Evaluations & Analytics

- Enable evals for makers
- Analytics – User Themes, ROI, Multi-Agent

Model Choice and Fine-Tuning

- MCS makers have access to the latest and greatest set of models when making their agent
- MCS can use a fine-tuned model to improve answers

Core Admin & Governance Capabilities

- Enhanced control system for Agents, and agent inventory
- Lifecycle and Zone governance
- Cost and Adoption Management
- Operations & Reliability Monitoring

Preview

Unlock data operation tools and agentic-tools for your agents

1. **More advanced MCP tools** in data discovery and management functions
CreateTable, UpdateTable, DeleteTable, DeleteRecord, SearchTool, and FetchTool.
2. **Support for Remote MCP in VSCode**
3. **Enable/disable tools in Copilot Studio**
4. **Experience upcoming tools in Preview mode** and help shape the final product with your feedback and influence on future releases. (Support coming in soon)

Dataverse (AI) Search

GA

Auto-indexed and glossary optimized for your business data

What's new?

Support for multi-line text and file attachment columns

Image reasoning

Adaptive Search, e.g. "quiet neighborhood in Seattle under \$100K"

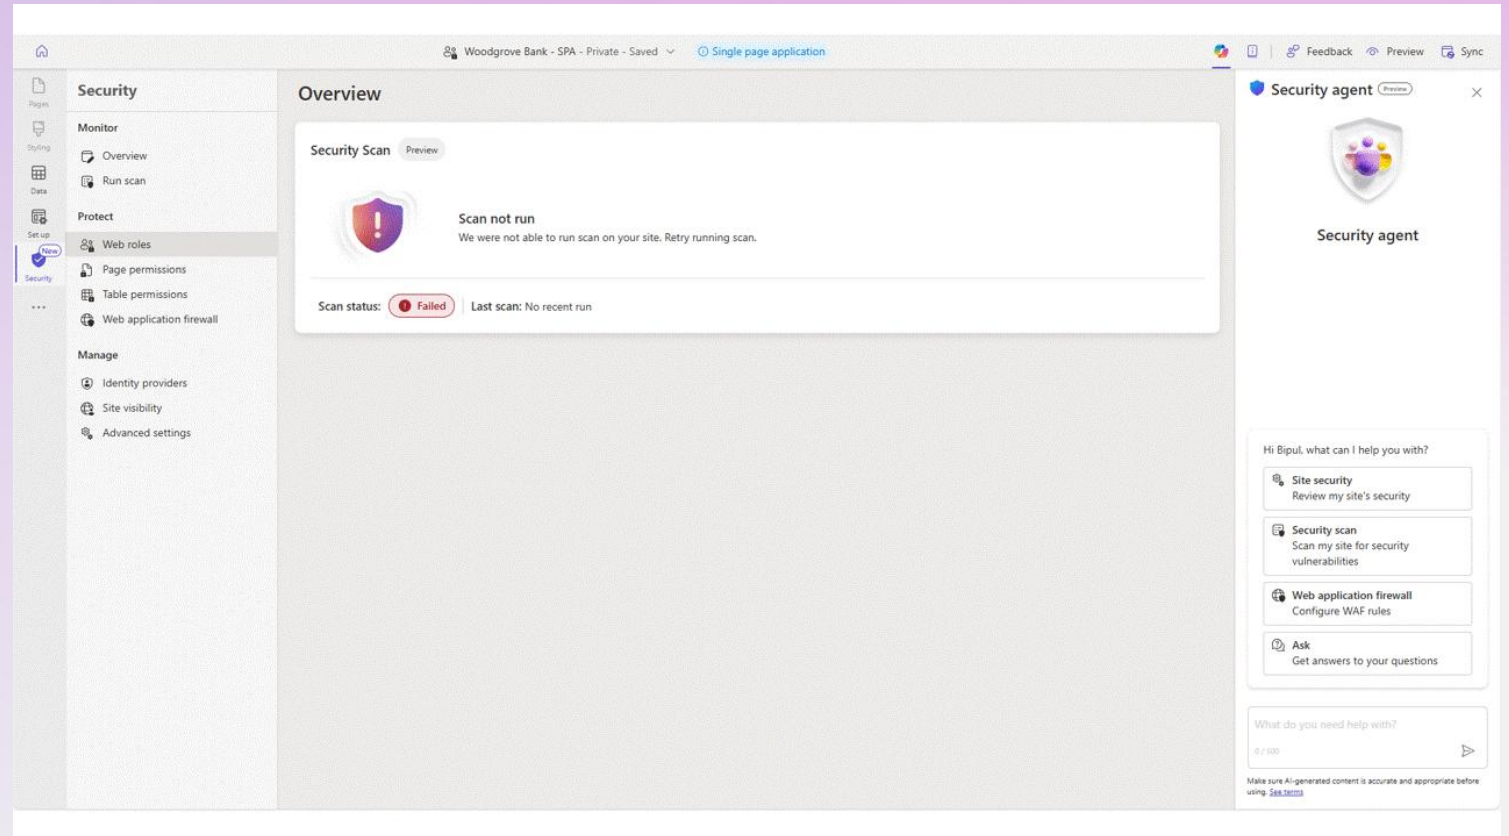

- Fuzzy matching,
- Semantic interpretation ("quiet" \approx "peaceful"),
- Composite queries (combines location + price + attributes without strict schema).

Agentic NL2SQL

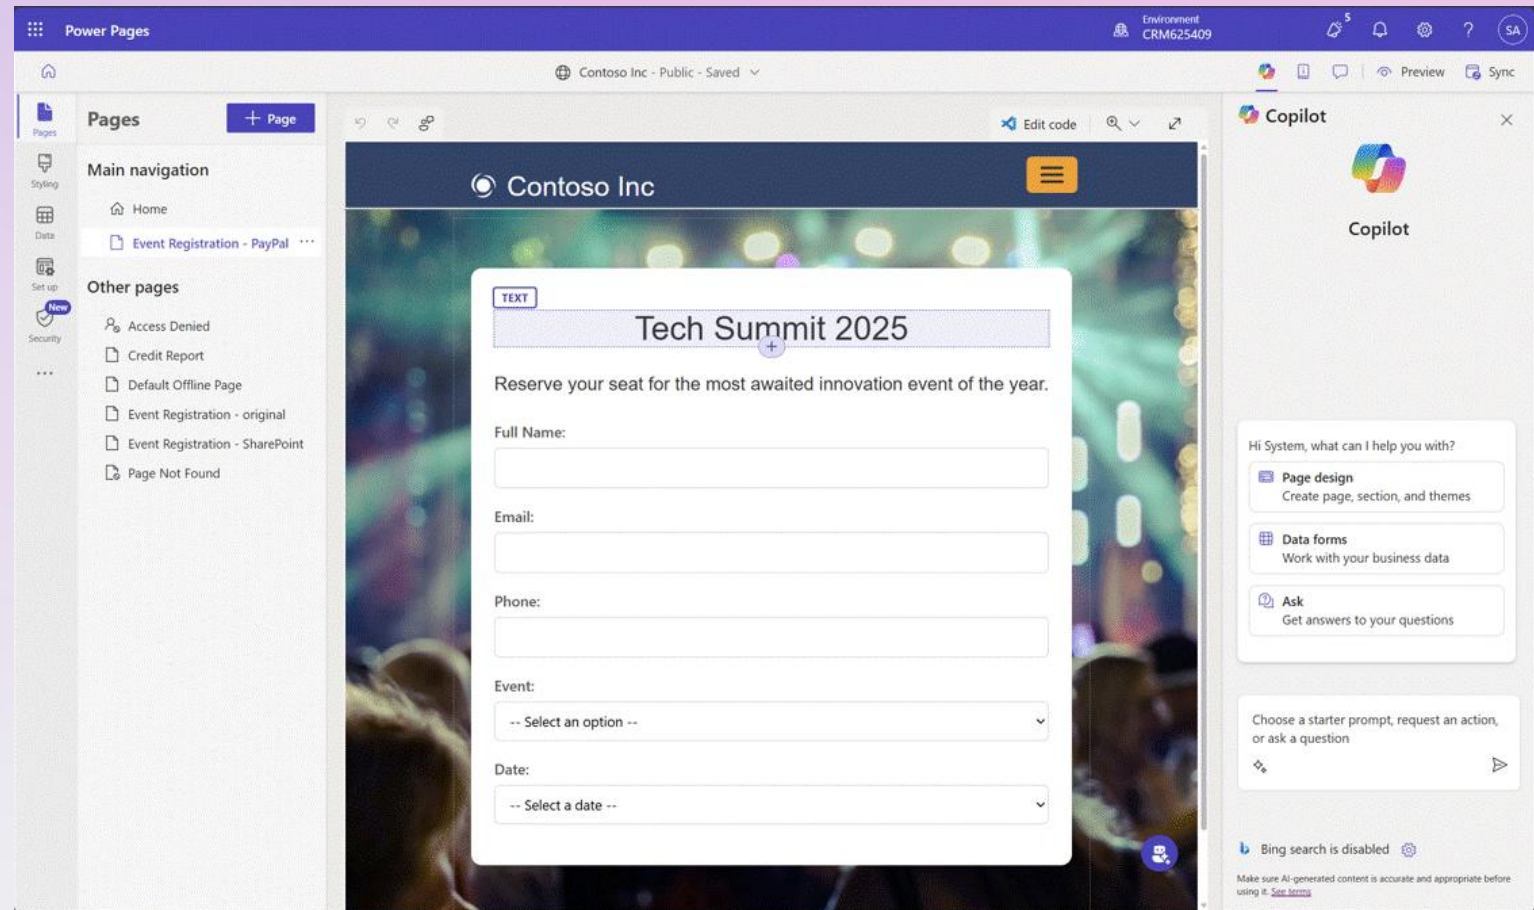

Security Agent for Pages (Nov)

- Always-on autonomous agent that continuously scans and monitors your sites for vulnerabilities and anomalies
- Context-aware intelligence that understands your site metadata, configuration to provide tailored recommendations.
- Seamless guided remediation through chat – autonomous fixes, approval-based actions, and multi-step workflows.
- Transparent tracking with proof-of-work, activity feeds, and clear reasoning for every security action.

Server Logic Layer

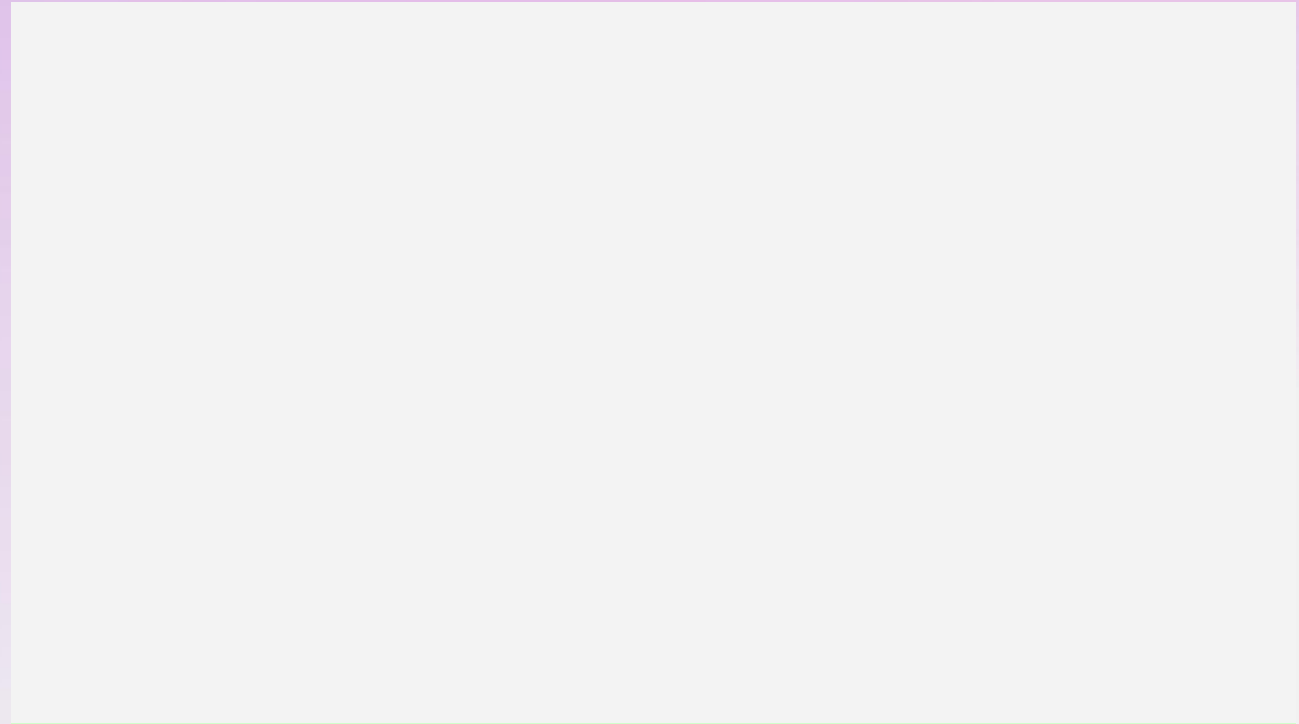

- Write & execute business logic on the server
- Bring extensibility directly into the site runtime
- Securely connect to Dataverse & external services over HTTP

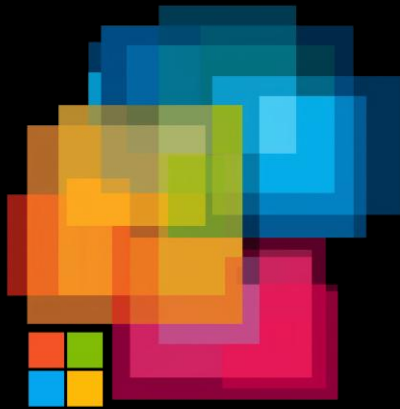

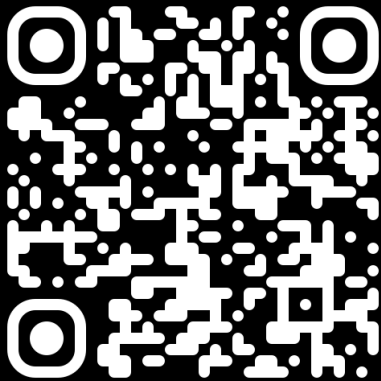

Bring Your Own Single Page Applications

- Develop site using React, Angular, or Vue, & bring the frontend into Power Pages
- Navigation doesn't require full page refresh, giving more app-like experience
- Integrates with Power Pages security, data, and Web APIs
